

## **Management of Livestock Exposed to Rabies**

### Currently Vaccinated

Animals are considered currently vaccinated for rabies if at least 28 days have elapsed since the initial vaccination, and the duration of vaccination has not exceeded the time period recommended for that species and brand of vaccine.

### Unvaccinated

Animals are considered unvaccinated if no approved vaccine exists for the species (16), if they are vaccinated by someone other than a licensed veterinarian in accordance with the requirement above, or if the vaccination is not within the time frame listed above.
